WORK EXPERIENCE

Department of Science and Technology - Regional Office No. VIII

Student Intern FEB 2026 - MAY 2026

- Developed web-based applications for automated document and form generation.
- Assisted in designing and maintaining responsive internal management systems.
- Completed technical training on enterprise intrusion detection systems.

PROJECT EXPERIENCE

Job Application Tracker

Description:

- Developed a responsive job application tracker using React, Tailwind CSS, and DaisyUI to manage, search, filter, sort, and paginate job applications.
- Implemented Local Storage for data persistence, with JSON import/export for backup and recovery, plus status indicators and direct links to job postings.

Internship Tracker

Description:

- Developed a web-based internship tracker using Django, Python, Tailwind CSS, and DaisyUI to record daily time logs and automatically calculate rendered, accumulated, and remaining internship hours.
- Implemented a progress dashboard and monthly time record table for monitoring internship completion, attendance, and required hours. Deployed the application on PythonAnywhere with SQLite.
